FAQ

Are there any side effects?

Mild swelling, redness, or bruising may occur at the injection site but typically resolves within a few days. The swelling usually happened after 7-10 days.

How soon will I see results?

While some improvements may be visible after the first treatment, collagen stimulation is a gradual process. Noticeable results typically appear within 2-4 weeks and improve further with subsequent sessions.

Can this product be combined with other treatments?

This product can be combined with other cosmetic procedures. But always consult with your licensed practitioner.

Who should avoid this product?

Avoid this product if you are pregnant, breastfeeding, or have active skin infections in the treatment area. Always consult with a licensed practitioner to determine your suitability.

What should I do after treatment?

A detailed post-care guide is available. Please request it from your licensed practitioner.

STAY YOUNG

What is this product?

The first fully liquid-type PCL injectable, it rejuvenates the skin through collagenesis across the entire skin.

SPREADABILITY

This product naturally disperses and regenerates collagen with just a few injection points.

SUSTAINABILITY

This product provides long-lasting results by preventing skin aging through deep skin rejuvenation.

NATURAL IMPROVEMENT

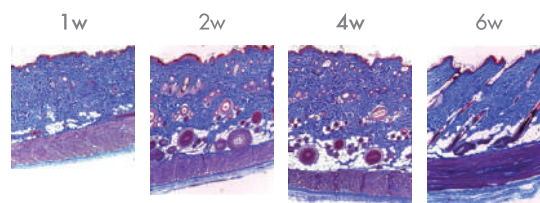

This product restores the collagen synthesis rate, which decreases with aging, and rejuvenates the skin.

COLLAGENESIS

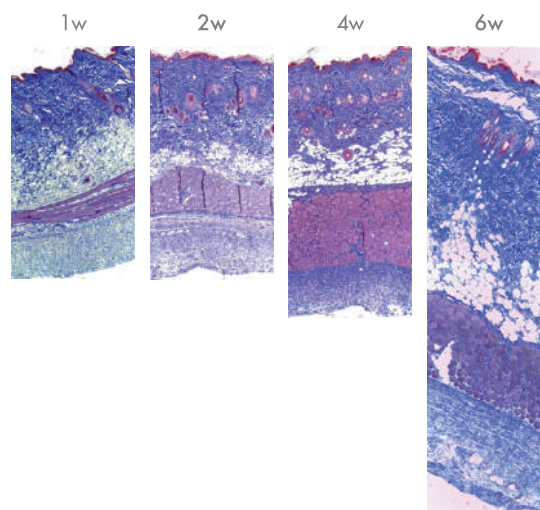

Enhances collagen production for thicker and stronger skin

PBS

The Product

** PBS, phosphate-buffered saline

It shows more densely packed and increased dermal collagen in the injected tissue, demonstrating that the maximal dermal thickness at week 6 may be attributed to neocollagenesis.

** Hong JY, Kim JH, Kwon TR, Hong JK, Li K, Kim BJ. In vivo evaluation of novel particle-free polycaprolactone fillers for safety, degradation, and neocollagenesis in a rat model. *Dermatol Ther.* 2021;34(2):e14770. doi:10.1111/dth.14770

STAY YOUNG COLLAGEN STIMULATOR

CESABP Technology

DEXLEVO's Collagenesis-Enabled Solubilized Active and Biodegradable Polymer Technology is a unique technology that enables regeneration of natural skin collagen and rejuvenates your skin without the microparticles.
